Xml format:

```xml
<?xml version="1.0" encoding="UTF-8"?>
<root>
        <data>
                <avatar>
                        https://s3.amazonaws.com/uifaces/faces/twitter/josephstein/128.jpg
                </avatar>
                <first_name>
                        Janet
                </first_name>
                <id>
                        2
                </id>
                <last_name>
                        Weaver
                </last_name>
        </data>
</root>
```

JSON format:

```json
{
    "data": {
        "id": 2,
        "first_name": "Janet",
        "last_name": "Weaver",
        "avatar": "https://s3.amazonaws.com/uifaces/faces/twitter/josephstein/128.jpg"
    }
}
```

java format:

```java
public class data {
        public int id;
        public String first_name;
        public String last_name;
        public String avatar;
}

public class Program{

        public static void main(String[] args) {
                data d=new data();
                d.id=2;
                d.first_name="Janet";
                d.last_name="Weaver";
                d.avatar="https://s3.amazonaws.com/uifaces/faces/twitter/josephstein/128.jpg";

        }

}
```
